

Our PARTNERS

NetSuite Solution Provider

NetSuite is an integrated application to help small businesses manage all of their business processes more efficiently and effectively, including accounting and finance, sales and service, Web presence, and employee management. Companies can save time and money and get unprecedented visibility into their operations by utilizing one centralized and up-to-date database, ending the headache of using multiple incompatible applications. With anytime, anywhere Web access, the award-winning solution is the first and only multi-user, multi-location complete small business management solution.

Oracle PartnerNetwork Member

For 27 years, Oracle has been helping customers manage critical information. Their goal is to make sure that you spend less money on your systems while getting the most up-to-date and accurate information from them. How can you do this? By simplifying or outsourcing your IT infrastructure to reduce costs, and by integrating disparate systems to create a single, global view of your business. Oracle sees an industry where people can focus on their business, not on their IT department, where businesses buy systems, not individual components that have to be cobbled together by high-priced consultants, and where cost predictability is a given, not an exception.

Avalara Implementation Partner

Today's savvy businesses recognize that sales tax automation, leveraging outsourced knowledge and expertise, is exactly the same as outsourced payroll management—a simple and accepted way of improving efficiency. Avalara products integrate seamlessly with scores of accounting, e-commerce, and point of sale systems. We have developed plug-ins for SAP, PeopleSoft, Oracle Apps, and J D Edwards that can connect Avalara to ERP applications.

Our SOLUTIONS

► Enterprise Solutions

Enterprise solutions can be never-ending ordeals for some users. The upgrades, the teething troubles during implementation and countless last mile issues can be truly taxing. We understand. Expect us to fill in the gaps, to stand by you. Ubika has extensive expertise in providing ERP consultancy and implementation/post implementation services on

- **Oracle:** Performance tuning, Clones and cloning automation, Implementations, upgrades (releases 11.0, 11i, and R12), Patching
- **J D Edwards:** New Implementation, Migrations from World, Co-existent Implementations, Integration Services, CNC and Infrastructure Consulting Services, Upgrades to New Releases
- **SAP:** Remote SAP Basis Services including Installation of all kinds of SAP Products & SLA based Production Support

► NetSuite

NetSuite is the first and only company to give growing and mid-size business on-demand Web-based business applications to run the entire company. Being a NetSuite SuiteFlex Solutions partner, we will provide you all NetSuite benefits at a substantially lower total cost of ownership (TCO).

► Custom Application Development

Our experienced system analysts and programmers work on your project from its conceptualization through and beyond its completion and implementation. We will manage the project engagement to ensure that the project remains on its intended course and within budget. Our services include:

- Application Development
- Migration and Customization

► Quality Assurance Testing

The following non-functional tests may be performed based on agreements with the client:

- Performance, Load and Stress testing
- Compatibility and Scalability Testing
- Database Performance Analysis

► Application Integration, SOA & Web Services

Almost all Fortune 2000 companies are planning several major IT projects in the next several years. Some of them will include Online E-Commerce, B2B, B2C, integration of new with existing ERP systems. Most of these new systems will be implemented using the data of today's legacy systems, which leads to integration of these applications.

Ubika has the expertise and the track record of having successfully delivered solutions in this space.

► Mobile Solutions

New Technologies are enabling innovative wireless products and services. We specialize in mobile development with experience in all the major operating systems from Palm to Symbian. Our developers are experts with years of experience in J2ME, BREW, Windows Mobile and Bluetooth and all the major wireless technologies.

Our PRODUCTS

► Avalara ERP Tax Solutions

It is very important for sales tax management to be fully integrated into your ERP or accounting system. With tight integration between applications with ERP system native language, Ubika empowers your ERP software with unprecedented sales tax functionality and management control that boosts business productivity while minimizing audit risk.

► ERP Wireless Integrator

Ubika's Enterprise Mobile Solutions help you deliver more with less. Our approach is marked by a focus on leveraging your current infrastructure to extend your business processes with cost-effective architecture. We have developed a cost-effective solution that can enable wireless, mobile access to your JD Edwards E1 or World system or mySAP.

► Ubika EAI

Ubika EAI offers an alternative to investing in costly, proprietary EAI solutions. With Ubika EAI graphical development tools, clients can significantly decrease the time to develop and deploy new integration components.
